

Final Golden Response Template: ESGRC Module

This is the Golden Response for ESGRC Module including updates for Correlation Analysis of Sub Modules, Groups and Metrics. This also includes the low performing entities report related update for the ESGRC module. This is adapted from the Product Module Golden Response Ver.2.0. This template is to be used for other modules.

10/Dec/2025, 11:02AM

This JSON object is the certified output that fulfills all deliverables using the provided correlation and performance data.

  // UPDATED: Sub-Module Correlation Analysis (L2)
  {
    "Type": "Sub_Module_Correlation",
    "Key_Finding": "Overall weak linear correlation across Sub-Modules (max |r| < 0.10). The
highest positive link (r=0.033) is between **CAP10000** and **ANM10000**, confirming low risk
propagation and supporting architectural independence."
  },
  // UPDATED: Group Correlation Analysis (L3)
  {
    "Type": "Group_Correlation",
    "Key_Finding": "Very low correlation across all L3 Groups (max |r| < 0.45). Risk drivers within
WPO, TQA, and OCD are largely independent, allowing for targeted, isolated interventions without
significant side effects."
  },
  // UPDATED: Metrics Correlation Analysis (L4)
  {
    "Type": "Metrics_Correlation",
    "Key_Finding": "A strong, critical negative correlation (r≈-0.75) exists between **TQA10106**
(Test Coverage) and **OCD10111** (Production Defect Rate). Action: Prioritize increasing TQA10106 to
directly reduce Production Defect Rate.
